The Question of David Keith

The sky is turgid and thick, a roiling convolution of suffering, hideous, pained and vile is she, filth spread across her once blue arch, now sullied, soiled and disgraced. They have been raping the planet since the 90s, now at a fevered pitch as never before, UVC radiation now on ground, and only toxic clouds of death could spare us the assault, ionizing radiation cascading down upon the tender shoots of green, and the herd of humanity alike. Mankind is masochistic, sadistic is he towards that which sustains his existence, and so, we see the lowest idiocy conceivable, the death drive itself: masochism. The world is being sprayed into a puddle of burnt pain, and all of life shudders and hopes only to escape this lowest idiocy ever perpetrated upon the moist tender home of man. Mankind, has achieved a remarkable thing, something more foolish than he has ever managed to achieve previously, he has found a way to irradiate and poison the entire globe and all living things. Incredible is this achievement, utterly incredible. The Earth and human race, the greater and the lesser, the host and the parasite, have achieved a new thing.

UVC readings have INCREASED to move from fall to winter. Supposedly, according to Wikipedia: "UV-C, which is very harmful to all living things, is entirely screened out by a combination of dioxygen (< 200 nm) and ozone (> about 200 nm) by around 35 kilometres (115,000 ft) altitude." We may infer that as my meter is most assuredly measuring only radiation over 220 nm, it is the ozone which is missing.

Cloud creation as radiation curtain: Now that the storm has passed and no longer offers something to work with, only the fly ash which is always over (and was within) such a storm remains. Through a thick haze of metals and toxins UVC is at 57 in winter. Soon, the plane shows up to lay more poison into the sky, and whew….better, now readings drop into the twenties and teens. Coincidence? Why did this poison show up here, now? The ozone is thinned to the point where all places require poisoning to produce a barrier against deadly radiation, which presumably the military has allowed in. What is sure, assuming an unchanging progression: A physical barrier will soon be needed such as this…but one even more effective.

NASA has their snout into the Yellowstone volcano. To tap contents to spray (sulfides for H2SO4?) or as an eruptive 'accident' to create the needed UV blocking effects? A NASAral disaster could loom.

Nothing beats sulphuric acid and volcanic effects for a healthy planet…sure enough!

In THE BENEFITS, RISKS, AND COSTS OF STRATOSPHERIC GEOENGINEERING http://climate.envsci.rutgers.edu/pdf/2009GL039209.pdf GEOPHYSICAL RESEARCH LETTERS, VOL. 36, L19703, doi:10.1029/2009GL039209, 2009

An interesting fact:

Nano-particulate filtration demonstrates a surprising effect where Brownian molecular collisions and electrostatic effects foster an inverse size/filtration-efficiency relation—the smaller the particle the more effectively it is filtered out. This unit meets the Navy's minimum requirements for nano-particulate removal of most unspecified particle types.

I mention that stray fact, as since they have begun the full scale assault upon the skies over my land and family we have all become quite ill, and are sure to contract many wretched diseases, to see the contaminants revealed in our bodily tests, and tests of our water and rain. I will list only a few pieces of relevant information.

Industrial toxins associated with geoengineering, coal fly ash and engineered nanoparticulates cause diseases:

David Keith is himself a question. He is a scientist out of Harvard, and appears to be the spokesman for the long deployed schemes which are, I believe, compensating for what should certainly be considered illegal weaponry and other anthropogenic foolishness, that in their deployment have now destroyed the ozone. See previous articles' readings from a NASA scientist who broke ranks, and those documenting my readings in confirmation. So, what do David Keith's papers contain? Is he mad, or perhaps stupid and incompetent, and so, unaware of the dangers?

No, he is not. The math is correct. The chemistry is correct. He is not stupid. The ideas are evolving, indeed, I see a clear trend. I will infer: He is quite alarmed, perhaps?…certainly correct in looking at the deadly difficulty which will eradicate life: ozone damage. He publishes papers with a new scheme, an erroneous idea which I believe is already being used that seeks to restore the ozone with calcite, more poison, you see. His concern for the situation is correct, but, I infer he lacks the ability to repair the ozone. He simply may not be aware, as the science is suppressed: Ozone is Magnecular.

See:
http://www.i-b-r.org/docs/Fuels-Magnecular-Structure.pdf

If he, or some scientist or officer other than he who is in charge, does not understand that the ozone may in fact be replaced using an efficient ozone generator, we may rest assured that in the unfortunate case that the situation keeps progressing at the current rate: the biome is in distinct and catastrophic danger…life itself could possibly be extinguished. Yes, I believe he may be…concerned.

I have sent him the following letter in hopes he will listen and understand the gravity of the situation, and that it can still be solved. We may replace the ozone to understand that it is magnecular and utilize its magnecular properties. Then, we need not poison the planet. So, David Keith is a question. Is he the devil's spokesman, or just a man who wants to do his best and when shown the facts—will he decide to do the right thing and replace the ozone? He has a company which could build and sell the generator, and I work with the finest scientist, Ruggero Santilli, the man who could help me design the correct unit, *and assess the proper role of existing technology*.

Perhaps he is unaware of the current level of deployment? Yes, perhaps. I have sent him the following letter to three addresses. He will read it. What will he say?

This is the question of David Keith:

Greetings Dr. Keith:

After review of your work I am convinced this is the single most important science being conducted in this era. Before I address the particular points which inspired me to write you, I will offer you a copy of my new book which contains the correct hadronic structure of the neutron and a proposed method to eliminate nuclear waste and produce clean energies free of radiation or pollution. This new physics holds also, the correct structure of the ozone molecule, and would allow us to easily create a super-efficient ozone generator, to replace atmospheric ozone deterioration without additional thermal effects. If you provide me a mailing address, I would be honored to send a copy.

The reason I am writing, is quite pressing and distinct. Your papers are very precise and correct, save one detail of import. I suspect you may possibly be unaware of this fact, hence my missive:

You state in many papers that the study of geoengineering is ongoing and the technology is not yet deployed, when in fact it has long been deployed. You may request a mountain of clear proof. The result of that, is as you rightly state, *ozone damage*, correct sir. Very good. I can confirm the chemistry you use is right in specifying those reactions. That damage is ongoing, and is measurably severe. Now, I have significant UVC readings on ground in midwinter, from the many years of active deployment which by my analysis includes a clear source of metals (including the needed aluminum) as are required to alter optical properties and allow infrared to escape, and I suspect, serve also as H_2SO_4 catalysts. Tests have determined coal fly ash as the main source of metals used.

There is concurrent ozone destruction by VLF and other anthropogenic sources of aurora via odd H and odd N catalytic reactions, that also create optically thin planet heating clouds by way of electron precipitation from the radiation belts, then creating microwave expression in the ionosphere and subsequent cloud generation.

Together, these factors have allowed UVC ionizing radiation through, and it is in the

amelioration of this and other ionizing radiation, that the main 'benefit' of the continuous creation of metal infused clouds is found. One can watch the UVC meter reading go into the teens as the clouds pass between the white sun and the earth, then, the meter goes straight up as the clouds part. Clearly, the creation of clouds serves to block the deadly radiation. This is a main yet unacknowledged purpose of geoengineering.

So, we may then analyze:

As is known: "UV-C, which is very harmful to all living things, is entirely screened out by a combination of dioxygen (< 200 nm) and ozone (> about 200 nm) by around 35 kilometres (115,000 ft) altitude."

We may infer that as my meter is most assuredly measuring only radiation over 220 nm, it is the ozone which is missing.

Clearly UVC on ground implies catastrophe for the biome. You are correct sir. These interventions cause deadly harm. Now that you see they are in fact long deployed, I do hope that you will help our struggling race of man overcome these dangers.

You see, my wife and I have been deeply effected. The emplacement of toxins is thick here. We are being sprayed with coal fly ash, and are becoming quite ill. Just as the many tests of sea life, we are filled up with aluminum and mercury, also, thallium, lead, barium, strontium and cesium. We are dying. You are right, these interventions are deadly, and destroy ozone. We can not breathe, we can not taste. Please, help us end these situations. You must be unaware of all of this. Perhaps you could assist?

My wife and I are unable to taste, our tongues burned at all times, we now have asthma and are very ill, the clouds and spray are relentless. I am easily able to design an ozone generator with my team…I work with fine scientists. Let us replace the ozone rather than add more dangerous chemicals, that in all cases without exception cause harm. The air must be pure, completely pure, the ozone *is to be restored*. Please ask for technology allowing the clean and complete burning of coal, and, the production of clean burning fuels from waste chemicals and other abundant sources.

I do hope you will consider making a public statement, concerning the fact:

Geoengineering is now long deployed for decades, and it is as you have stated…immensely harmful to the ozone. It must be terminated in every aspect, immediately.

My wife has levels of metals which exceed the test's ability to register, we are quite ill and sure to get cancers, our throats and tongues burned for months now. Yes, Dr. Keith, it has already been deployed, and you are right, it destroys ozone. I have researched the effects of the nanoparticulates in detail. I have proper and correct analysis of the contaminants you may request. I have researched the tissue types, body and brain anatomy affected, and derived those pathologies implied. Please observe these basic

calculations:

At—LA: 3.976 Million population and San Diego: 1.407 Million population—

We may estimate a conservative total of over 5 million people. Let us reduce the likely twenty years of life taken from each citizen to ten, and find a conservative figure of 50 million years of life stolen by geoengineering in just those two cities! The contaminant analysis is at 99 percent confidence interval. To consider the demonstrated worldwide population effects I (being of Jewish descent) deduce: this is a crime against humanity, larger than that of the Nazis.

I do hope you understand the seriousness of the situation. I am sure you do. Thank you, sir. Now that you know, I do so hope you will help expose the truth, before your predictions concerning ozone depletion become a fact too deadly to avoid.

Let us make a public statement, and take a firm stand to end this immediately, and preserve our planet and race from these deadly assaults.

Thank you for all your hard work.

Be well,
